

Equithrive® GUT Pellets are formulated for full GI support, from the foregut to the hindgut. Packed with probiotics, prebiotics and nutrients that support a healthy gastrointestinal microbiome, dietary nutrient absorption and overall wellness in horses of all ages and breeds.

Simply add the highly palatable pellets to the daily feed tub for proactive support and protection.

Active ingredients in Equithrive GUT Pellets include:

Saccharomyces boulardii (microencapsulated) – the primary probiotic in this product - may reduce risk of diarrhea associated with administration of antibiotics; has been shown to increase resistance to microbial infections; promotes continued health and viability of beneficial gut bacteria during periods of stress. Microencapsulated to ensure it reaches the GI tract.

Saccharomyces cerevisiae – aids in the maintenance of appropriate gut pH during digestion and improves forage digestibility.

Lactobacillus acidophilus – aids in the maintenance of appropriate gut pH during digestion.

L-Glutamine – an amino acid prebiotic that maintains gut health during periods of stress.

Calcium Carbonate – buffers gastric acids that may be produced in excess during digestion.

Citrus Bioflavonoids – protect against oxidative stress and support a healthy inflammatory response in the gut.

Omega 3 Fatty Acids - supports a healthy inflammatory response.

Inactive Ingredients: Alfalfa Meal, Calcium Propionate, Flaxseed Meal, Flaxseed Oil, Lignin Sulfonate, Natural Flavor, Water, Yeast Culture.

Directions for Use: Administer 50 g (4 scoops) orally per day. For best results, divide recommended daily dosage between AM and PM.

1 scoop= 12.5 g

| Active ingredients per scoop (12.5 g) | Amount |
|---|------------------|
| L-Glutamine | 750 mg |
| Calcium Carbonate | 625 mg |
| Citrus Bioflavonoids | 250 mg |
| Saccharomyces boulardii (microencapsulated) | 12.5 Billion CFU |
| Lactobacillus acidophilus | 550 Million CFU |
| Saccharomyces cerevisiae | 385 Million CFU |
