Feeding Instructions:

Taking care of your dog's overall health starts by feeding him properly.

- Adjust amounts accordingly over time. Please remember these portions are averages & will vary according to age, activity, size & temperament of your dog.

- During gestation and lactation, feed two to three times as much food as recommended in the Daily Feeding Guide for the weight of your adult dog.

- When introducing Earthborn Holistic Great Plains Feast to your dog's diet, mix increasing amounts of Great Plains Feast with decreasing amounts of the old food over a one-week period.

- Puppies start to eat solid foods at three to four weeks of age and should have free access to solid food from this time until weaning. You may keep Great Plains Feast before your puppy at all times; most puppies will satisfy their nutritional needs as their appetite dictates.

- Have clean, fresh water available for your dog at all times.
