

## BYPASS FUSE

Thank you for selecting this quality GRIOT'S product. Your **BYPASS FUSE** is simple to install and suitable for side post and top post style **BATTERY QUICK DISCONNECTS**. Enjoy the best!

STEP 1

### USEFUL INSTRUCTIONS

Simply attach one eye connector to the pinch bolt (A) securing the **QUICK DISCONNECT** to the battery. The other eye connector attaches to the pinch bolt (B) on the battery cable (C). This allows a small amount of electricity to flow past the **QUICK DISCONNECT** to keep the clock working and the radio stations programming from being lost. Make sure the 15-amp fuse has been installed properly into the fuse holder.

### PRECAUTIONS AND DISCLAIMER

The **BYPASS FUSE** will allow a small amount of electricity to operate vehicle functions such as the clock, on-board computer systems and radio station memory functions. Over time this can cause the battery to drain, requiring it to be recharged. GRIOT'S GARAGE is not responsible for any misuse of the **BYPASS FUSE**, for any damage incurred to any person or object related to the **BYPASS FUSE**.

### ANSWERS TO YOUR QUESTIONS

Should you have any questions about the application of the **BYPASS FUSE**, please call our Customer Service Department at 800-345-5789 or email to [info@griotsgarage.com](mailto:info@griotsgarage.com).
