Here’s how easy it is to create flawless paint!

1. **Wash**
   Remove loose contaminants using a traditional hose and bucket, foaming system, rinseless, or waterless method.

2. **Clay**
   Prep the surface and produce a truly clean slate by removing stubborn, embedded contaminants from your paint.

3. **Butter**
   Spread product onto pad face starting at center and work to outer edge. Spread evenly with domed cap.

4. **Polish**
   Place the buffing pad onto paint, set machine speed to 2, then spread product in a small area. Turn speed up to 3-5 for polishing.

5. **Wipe**
   After polishing wipe residue away with a premium microfiber towel, turning the towel often, then buff to a brilliant luster.

Have fun in your garage!

See perfection in every reflection

You’ve made a great choice putting this tool in your hand.
Let me tell you with complete assurance... you’re about to have the most fun you’ve ever had in your garage. Removing swirl marks and other surface defects from paintwork always brings a smile to my face. The balance and comfort of this tool, mixed with the amazing results it creates will have you grinning from ear to ear in that mirror-like finish. Of course, we are here if you need us. Training videos are on YouTube, griotsgarage.com, or if you just need to talk to a pro, give us a call at 800-345-5789. Now stop reading and go have some fun!
# Advanced Paint Care Options

## Decontaminating Surface
Remove loose and bonded contaminants prior to polishing.

1. Wash and dry
2. Assess the surface
3. Clay if rough

### Embedded Contaminants
- Overspray fallout
- Brake dust
- Tree sap mist
- Water spots
- Road debris

#### Use These Products
- Brilliant Finish™ Synthetic Clay with Primer
- BOSS™ Fast Correcting Cream with BOSS™ Fast Correcting Foam Pad
- BOSS™ Finishing Sealant with BOSS™ Correcting Foam Pad

#### Application
- Paint Cleaning Clay
- BOSS™ Fast Correcting Foam Pad
- Brilliant Finish™ Synthetic Clay

---

## 1-STEP Surface Condition
**Wax Ready Paint**

**Correct**
- Color Coat
- Primer

**Perfect**
- Color Coat

**Protect**
- Color Coat

### Application
- Liquid Gloss Poly Wax with Red Foam Waxing Pad
- Best of Show® Wax with Red Foam Waxing Pad
- BOSS™ Finishing Sealant with BOSS™ Correcting Foam Pad

## 2-STEP Surface Condition
**Fine Swirls, Scratches, and Stains**

<td></td>
<td>BOSS™ Finishing Sealant</td>
</tr>
<tr>
<td></td>
<td></td>
<td>BOSS™ Correcting Cream</td>
</tr>
<tr>
<td></td>
<td></td>
<td>BOSS™ Perfecting Cream</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Liquid Gloss Poly Wax or Best of Show® Wax</td>
</tr>
</tbody>
</table>

## Polishing Tips
- First do no harm. Always use the least invasive method first. Test method in a small area and adjust approach if necessary.
- Dedicate your pads to one product. Never apply wax on a pad you’ve used to polish.
- Butter entire pad face prior to application using domed cap. Reapply 3 or 4 opposing drops on each subsequent panel.
- Set appropriate machine speed per reference chart.
- Place power cord over your shoulder to avoid contact with the surface of your vehicle.
- Always start and stop machine with pad resting gently on the surface.
- Frequently clean pad by running it against a Foam Pad Conditioner Brush or towel.

## Correcting and Perfecting
**Work one section at a time,** then remove any remaining residue immediately by hand using a Microfiber Plush Edgeless Towel.

### Waxing and Sealing
Apply a thin, even layer to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe to a brilliant shine using a PFM® Dual-Weave Wax Removal Towel.

### Buffing Pad Maintenance
Following work, rinse pads thoroughly with hot water, treat with Microfiber & Foam Pad Cleaner, allow to dwell, rinse thoroughly, and air dry.

### Tip of the Trade
- Amplify the correction speed of your BOSS™ Creams by pairing with our BOSS™ Microfiber Pads.
- BOSS™ Microfiber Fast Cutting Pads
- For rapid removal of moderate to severe defects.
- BOSS™ Microfiber Pads
- Improved conformability to body panels for rapid removal of moderate to severe defects.

### NOTE
- Always finish with foam for optimal clarity.
