Here’s how easy it is to create flawless paint!

1. **Wash**
   Remove loose contaminants using a traditional hose and bucket, foaming system, rinseless, or waterless method.

2. **Clay**
   Prep the surface and produce a truly clean slate by removing stubborn, embedded contaminants from your paint.

3. **Butter**
   Spread product onto pad face starting at center and work to outer edge. Spread evenly with domed cap.

4. **Polish**
   Place the buffing pad onto paint, set machine speed to 2, then spread product in a 2' x 2' area. Turn speed up to 3-5 for polishing.

5. **Wipe**
   After polishing wipe residue away with a premium microfiber towel, turning the towel often, then buff to a brilliant luster.

Have fun in your garage!
# ADVANCED PAINT CARE OPTIONS

## METHOD

<table>
<thead>
<tr>
<th>Decontaminate Surface</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remove loose and bonded contaminants prior to polishing.</td>
</tr>
<tr>
<td>1 - Wash and dry</td>
</tr>
<tr>
<td>2 - Assess the surface</td>
</tr>
<tr>
<td>3 - Clay if rough</td>
</tr>
</tbody>
</table>

## USE THESE PRODUCTS

<table>
<thead>
<tr>
<th>Embedded Contaminants</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clear Coat</td>
</tr>
<tr>
<td>Color Coat</td>
</tr>
<tr>
<td>Primer</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Delicate &amp; Finishes Synthetic Clay used with Speed Shine®</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Following a wash, mist a liberal application of Speed Shine onto the paint to serve as a lubricant.</td>
</tr>
<tr>
<td>• Then gently glide a Brilliant Finish Synthetic Clay Pad across surface until smooth.</td>
</tr>
<tr>
<td><strong>Pro Tip</strong>: Break-in Synthetic Clay by treating glass first. Always work on a cool surface.</td>
</tr>
</tbody>
</table>

## ASSESS SURFACE CONDITION: SELECT ONE OF THE FOLLOWING OPTIONS BASED ON: 1. PAINT CONDITION 2. TIME ALLOWED 3. DESIRED RESULTS

### 1-STEP Pure Protection

- **Wax Ready Paint**
- **Liquid Gloss Poly Wax** | **Speed Setting: 2-3** |
  - For high gloss and maximum protection.
  - Using moderate arm speed, apply a thin, even coat to entire vehicle, then remove residue when dry using a premium microfiber towel.
  - **Best of Show Wax** | **Speed Setting: 2-3** |
  - For maximum color, depth, and clarity.
  - Apply a thin even application to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe clean with a premium microfiber towel.

### 1-STEP All-In-One

- **Fine Swirls, Scratches, and Stains**
- **Liquid Wax 3-in-1** | **Speed Setting: 2-3** |
  - Using slow arm speed, apply a thin, even coat to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe clean with a premium microfiber towel.

### 2-STEP Correct & Protect

- **Light Swirls, Scratches, and Stains**
- **STEP 1**
  - Complete Compound® | **Speed Setting: 3-4** |
    - Using slow arm speed, work one section at a time, then immediately remove residue using a premium microfiber towel.
  - **STEP 2**
    - Liquid Wax 3-in-1 | **Speed Setting: 2-3** |
      - Using moderate arm speed, apply a thin, even coat to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe clean with a premium microfiber towel.

### 3-STEP Best of Show® Method

- **Moderate Swirls and Scratches**
- **STEP 1**
  - Complete Compound® | **Speed Setting: 4-5** |
    - Using slow arm speed, work one section at a time, then immediately remove with a microfiber towel.
  - **STEP 2**
    - Complete Polish | **Speed Setting: 3-4** |
      - Work one section at a time, then immediately remove with a microfiber towel.
  - **STEP 3**
    - Best of Show Wax or Liquid Gloss Poly Wax | **Speed Setting: 2-3** |
      - Using moderate arm speed, apply a thin, even coat to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe clean with a premium microfiber towel.

---

### Polishing Tips

- First do no harm. Always use the least invasive method first. Test method in 1” x 1” area and adjust approach if necessary.
- Dedicate your pads. Don’t apply wax to a pad you’ve polished with.
- Butter entire pad face prior to application using domed cap. Reapply using 3 or 4 opposing drops on each subsequent panel.
- Set appropriate machine speed per reference chart.
- Place cord over your shoulder to avoid contact with paint surface.
- Always start and stop machine with pad resting on the surface.
- Keeping pad flat to the surface, work in 2” x 2” sections. Let each panel be your guide.

### Additional Tips

- Apply using overlapping, light-pressure passes with steady arm speed.
- Frequently clean pad by running it against a Foam Pad Conditioning Brush or towel.
- **Compound & Polishing**
  - Work one section at a time, then remove residue immediately by hand using a microfiber towel.
- **Waxing & Sealing**
  - Apply a thin, even layer to entire vehicle. Allow residue to dry to a haze or wait 20-30 minutes then wipe clean with a premium microfiber towel.
- **Pad Maintenance**
  - Following work, rinse pads thoroughly with hot water, treat with Microfiber & Foam Pad Cleaner, allow to dwell, rinse thoroughly, and air dry.
