The Graphic Organizer Pocket Chart was designed to help teach students how to organize their thoughts. This can be used for multiple grade levels and subject areas. These charts are great to compare similarities and differences among many different topics.
studied in the classroom. Graphic Organizers are research-based instructional tools to use to organize thoughts when writing, brainstorming, or testing.

The Venn Diagram is a common way to organize information. It is made up of two or more overlapping circles. It is often used in mathematics to show relationships between sets. In language arts instruction, Venn Diagrams are useful for examining similarities and differences in characters, stories, poems, etc.

A Venn Diagram is frequently used as a prewriting activity to enable students to organize their thoughts prior to writing a compare and contrast essay. This activity enables students to organize similarities and differences visually, before writing about them.

T-Charts are a type of graphic organizer in which a student lists and examines two parts of a topic, such as the pros and cons associated with it, its advantages and disadvantages, facts vs. opinions, etc.

Use the blank cards provided and start organizing the students’ thoughts. When not in use, the two large pockets offer easy storage. The possibilities of the Graphic Organizer Pocket Chart are endless!
