The Hamburger Sequencing Pocket Chart was designed for its versatile uses including the assistance in a variety of lessons. Along with the pocket chart are 24 cards: 12 pre-printed and 12 blank. These cards were specifically designed to provide multiple uses for this chart, such as: the Scientific Experiment, Parts of a Paragraph, Parts of a Five Paragraph Story, etc. The hamburger model is a great mnemonic device that will help students memorize the processes and procedures that are being studied. Each layer of the hamburger represents a different level or step in the process. The possibilities of the Hamburger Sequencing Pocket Chart are endless!
