Learning the Alphabet is so much fun with Inside Answers!

Play a listening game. Pair up two children or an adult with a child. One person will be the reader first. The reader will name the two images on one side of the card and the other person will have to say the beginning letter by only listening to the words given, not seeing the images. After the letter is given, the reader will look to see if his partner was right. Then the reader passes the card to the second player so she can use the alternate side.
Includes:
Set of 13, double-sided, self-checking cards

Inside Answers Alphabet is an innovative card set for young children. They will learn and practice the letters of the alphabet and beginning sounds.

How to Use:
Each card is double-sided and the cards progress in alphabetical order. There are two real-life images on each card. First, children should look at each image and say the word for the image aloud. Then, children should determine the letter that each word starts with.

Now the fun begins! Children slide the cards open to reveal the beginning letter to see if they were correct. The letter is shown in uppercase and lowercase so children can identify both letters. The vowels are in red and the consonants are in blue to focus on different types of letters and sounds.

Extension Activities:
- After working with a card, challenge children to think of other words that start with the same letter.
- Pull out all vowel cards. The image on the left begins with a short vowel and the image on the right begins with a long vowel. Discuss the difference.
