Battery Care and Maintenance Tips

- Use AA and AAA batteries only.
- Be sure to insert batteries correctly (with adult supervision) and always follow the toy and battery manufacturer’s instructions.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (nickel-cadmium) batteries.
- Insert batteries with the correct polarity.
- Do not recharge non-rechargeable batteries.
- Change rechargeable batteries under adult supervision.
- Remove rechargeable batteries from the toy before charging.
- Only use batteries of the same or equivalent type.
- Do not short-circuit the supply terminals.
- Always remove weak or dead batteries from the product.
- Remove batteries if product will be stored for an extended period of time.
- Store at room temperature.
- Wipe the surface with a dry cloth.
- Do not mix new and used batteries.
- Please retain these instructions for future reference.

Installing and Replacing the Batteries

**Main Unit:**

**Requires:** Phillips screwdriver, 3 AA batteries

Batteries should be installed or replaced by an adult. Quizzillion® requires 3 AA batteries (not included). The battery compartment is located on the bottom of the main unit. To install batteries, first undo the screws (using a Phillips screwdriver) and remove the battery-compartment door. Install batteries as indicated inside the compartment. See last page of guide for additional notes on proper battery care.

**Handheld Remotes:**

**Requires:** Phillips screwdriver, 2 AAA batteries

Batteries should be installed or replaced by an adult. Quizzillion requires 2 AAA batteries (not included). The battery compartment is located on the bottom of the unit. To install batteries, first undo the screws (using a Phillips screwdriver) and remove the battery-compartment door. Install batteries as indicated inside the compartment. See last page of guide for additional notes on proper battery care.

**Using the AC Adapter**

Quizzillion is also compatible with the LER 6989 AC Adapter (sold separately). For information on purchasing this adapter, please call 1-800-222-3909.

**Introduction**

Thank you for purchasing Quizzillion, the “Build-Your-Own Quiz Game.” Quizzillion is an interactive quiz system designed for the classroom or home use. With Quizzillion, it’s simple to build your own exciting quiz games for one to four players! Simply record all multiple-choice questions and up to four answers. Quizzillion stores them in the unit for playback.
**Basic Controls**

**Main Unit:**
- **ON/OFF** – To turn the unit on or off
- **GAME** – A mode-selecting button to toggle between the three game modes
- **RECORD** – To record each of the questions and answers
- **< / > ARROWS** – These buttons are used for stepping through questions in Quiz Setup. Pressing the < arrow will step backwards, and allow users to re-record the previously recorded question and set the answers. Pressing the > arrow will step forward and confirm, or enter, a recorded question or answer.
- **VOLUME** – Press and hold either < / > button at any time to adjust the sound volume

**Remote:**
- **A** – Press to answer “A” to a given question
- **B** – Press to answer “B” to a given question
- **C** – Press to answer “C” to a given question
- **D** – Press to answer “D” to a given question
- **ENTER (trigger button on the underside of each remote)** – Press to “buzz in” to answer

The remote is also used in Quiz Setup. Please see the SETTING UP section for more information.

**Setting Up and Recording a Quiz**

1. Press On/Off to turn the unit on (the lights will flash).
2. Press the GAME button once and wait for Game 1 to appear at the very top of the screen. Press the > arrow button to begin.
3. Press the GAME button to toggle through the two types of quizzes:
   - **10 Q (a 10-question quiz)**
   - **FREE (any number of questions — limited to 4½ minutes of recording time)**

**REPLAY** (This only appears and starts the quiz after a quiz has been saved)

4. Press the > arrow to select and confirm. Question 1 will appear on the screen and you will hear, “Record a question.”
5. Press and hold the record (REC) button. When the lights flash, record the first question.
   - **Note:** The dome must be flashing to record. There is an eight-second limit on any question or answer. If you exceed the limit, the question will not record.
6. When you finish recording, release the REC button to hear the question play back.
7. Press REC again to rerecord the question or press > arrow to accept and begin recording the answers.
8. Press the REC button to record the first answer, A. Release the REC button to hear it play back. Press REC to rerecord or press the > arrow to accept and advance to answer B. Repeat for answers C and D.
   - **Note:** It is best to record four answers, but if you want to have less than four answers, press the > arrow to advance through the unused answers.
9. Mark the correct answer by pressing the applicable answer button on any remote. The unit will say the answer and display the correct answer on the screen. If you made a mistake, simply press the correct answer on the remote.
10. Press the > arrow to lock in the correct answer.
11. Press the > arrow again to advance to the next question. Continue until all questions and answers are recorded.
   - **Note:** If you make a mistake while recording, press the backwards < arrow to skip back two questions. Rerecord starting with the question that appears on the screen. For example, if you were recording question four when you pressed the < button, you will need to rerecord starting with question three.
12. After the final answer is recorded and locked in (>):
   for a 10-question quiz, after question 10 answers are
   recorded, the quiz will automatically be saved. Press
   On/Off or press GAME to start playing (see step 3 under
   Playing the Game).

   For a FREE quiz, press > until the word “question”
   appears on the screen and then press the GAME button
   to save the quiz.

   The quiz will be saved until you record a new quiz.

### Playing the Game

There are three game modes:

**Game 1** – Standard quiz mode for 1 to 4 players. Each player
(or team) uses a remote to answer multiple-choice questions.
Quizzillion will play each of the pre-recorded questions and
answers. After all answers are played, players buzz in using the
enter trigger on their remotes. The first player to buzz in has a
chance to answer the question. A correct answer earns points.
An incorrect answer allows another player to buzz in. After
every player has buzzed in once, Quizzillion will allow a player
to buzz in for a second time to answer the question.

**Game 2** – Hot Seat mode is similar to the standard quiz mode,
but with one exception: after the questions and answers are
played, Quizzillion chooses a player to answer the question.
That player answers using his remote. Only correct answers will
score points.

**Game 3** – Live mode allows Quizzillion to be used without pre-
recorded questions. One person reads a question aloud. The first
player to buzz in answers the question. Scores must be kept
manually in this mode.

1. To begin, press the GAME button to toggle through the
game modes (these appear at the very top of the
screen). Press the arrow > button to select.

2. Press the GAME button several times until REPLAY
appears on the screen. Press the arrow > button to select.

3. REGISTER will appear on the screen. Players point their
remotes at Quizzillion and press the enter trigger.
Quizzillion will call out the color as confirmation.

4. When all players are registered, press GAME to begin the
quiz. Press GAME at any time to reregister and start the
quiz over.

   **Note**: During game play, Quizzillion will repeat a question if
   no one buzzes in after a short time. After every player has
   buzzed in once, Quizzillion will allow a player to buzz in for
   a second time. A correct answer must be given in order to
   advance to the next question.

### Scoring

Players score 100 points for each correct answer and no points
for incorrect answers. At the end of the game, Quizzillion will
announce the scores and the winning player — and the dome
will glow the winner’s color!

### Troubleshooting

Recording: If the unit doesn’t record, press the record button
again and be sure the dome is flashing before you begin
recording. Be sure your recording is not longer than eight
seconds. Quizzillion will not record any part of the question or
answer if it goes over the eight-second time limit.

If Quizzillion works erratically, insert a paperclip and depress the
reset button on the bottom of the unit. If this does not correct
the problem, insert fresh batteries.

If you make a mistake while recording, press the backwards
arrow < button and record over, starting with the number
question that appears on the screen. This means that the last
question you saved will need to be rerecorded. For example, if
you were recording question four when you pressed the <
button, you will need to rerecord starting with question three.
