

Powr-Flite®

Battery Operated Burnisher

Superior run time with proven reliability in a battery burnisher!

The new Powr-Flite battery-operated burnisher provides a smooth, even finish. The powerful 2.5 hp direct drive motor, with circuit breaker protection, provides a full 2400 RPM for superior gloss performance. The fully adjustable pad pressure lets you decide the pressure you need for optimum performance. Dust is easily contained in the paper bag – no more dust mopping after burnishing! The folding handle adjusts for variable operator height and folds for transport or storage.

- ***21 inch pad diameter***
- ***Fully adjustable pad pressure with meter***
- ***2.5 hp direct drive motor***
- ***Floating pad for full floor-to-pad contact***
- ***Dust control vacuum system***
- ***Adjustable handle heights***
- ***3-4 hour run time with 36 volts***

Control panel with battery, pad pressure and motor status meters.

Built-in dust control system with replaceable paper vacuum bags.

The B2001 uses 3 12-volt batteries with an average run time of 3-4 hours.
Recommended batteries: Trojan J185HC
U.S. Battery US-185 HC Interstate U-185HC

Easy accessible pad changing.

Model B2001 SPECIFICATIONS	
Pad Speed	2400 RPM
Pad Diameter	21 inches full pad-to-floor contact
Pad Pressure	Fully adjustable with meter
Motor	2.5 hp
Transmission	Direct drive
Batteries	36 volt – 3 - 12 volt, 215 AH
Base Housing	Polyethylene impact resistant
Hood Housing	Polyethylene impact resistant, removable
Pad Driver	Flexible, total 20" floor-to-pad contact
Pad Pressure (lbs.)	35-40 lbs
Handle Grips	Spring loaded, twist type, engages pad rotation
Handle Tube	All steel (adjustable)
Operating Wheels	Non-marking, 8" easy rolling
Wiring	All completely enclosed in housing
Switch Housing	Non conductive- commercial grade
Operation Control	Twist handle and master switch
Warranty	10 yr housing, 2 yr motor, 1 yr parts
Work Rating (ft² / hr)	25,000
Weight	140 lbs. (515 lbs. w/batteries)
