Model PF80HF HEPA Upright

True HEPA
Filtration in a
Commercial
Upright!

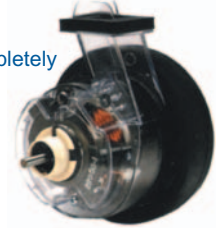

800.880.2913

www.PowrFlite.com

Motor	9 amp, long life
Handle	Ergonomically designed molded handle
Cord	50 ft, double insulated
Bag	Standard AA style bags
Fan	Commercial grade
Agitator	15" replaceable brush roll
Cleaning Width	15 inch
Belt Drive	Flat belt – easy to change
Switch	Heavy-duty handle mounted for fingertip control
Volts	110 volt
Height Adjustment	7-positions
Furniture Guard	Yes
Cord Retainers	Quick release
Overall Height	45 inches
U.L. & C.S.A. Approved	YES
Warranty	1 Year – Motor, Parts, Workmanship
Weight	20 lbs.

Wands and tools fit conveniently and securely right on the vacuum

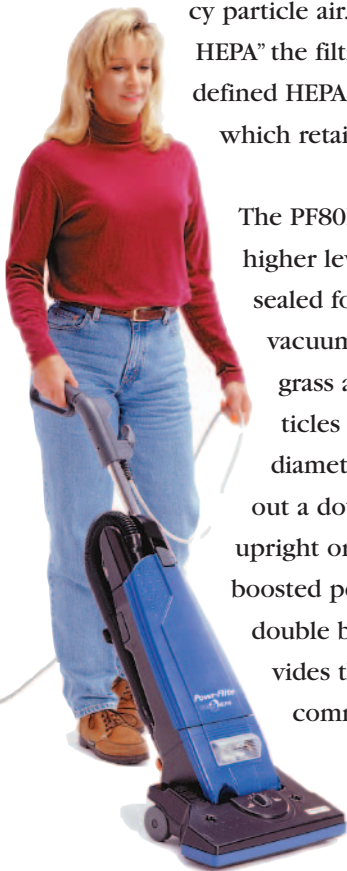

The 9 amp long life motor is completely sealed inside the vacuum

Improve air quality with the new PF80HF HEPA Upright Vacuum!

The Powr-Flite PF80HF provides true HEPA filtration with top performance in an affordable single-motor design.

HEPA is not a brand name, it is a standard developed over 45 years ago which stands for high-efficiency particle air. To be designated "true HEPA" the filtration system must meet the defined HEPA standard for air-filtration which retains particles of 0.3 microns.

The PF80HF takes air filtration to a higher level. The entire system is sealed for clean performance. This vacuum retains 100% of dust mites, grass and ragweed pollen plus particles 75 times smaller than the diameter of a human hair. It is without a doubt, the best filtration upright on the market. We've also boosted performance with a powerful, double ball-bearing motor that provides the suction power needed for commercial cleaning without the

Heavy-duty, but easy-to-push wheels provide low force to push. Helps reduce fatigue

expense of two motors. And the motor is protected from heat with a built-in thermal protector.

The PF80HF is easy to use, but tough enough to handle any job. It is made of heavy-duty polycarbonate with metal telescopic wands. The right offset design extends the reach of the vacuum so you can get under furniture or other obstructions easily. The all bristle ball-bearing brush roll gives you extra cleaning power... getting the dirt you can't see.

The PF80HF is the only commercial vacuum with True HEPA filtration
